THE TEMPORAL BLINDSPOT: AUDITING WHAT NO LONGER EXISTS

During the dock receiving audit on **5/15/2026**, the Tampa Flagship (#042) was billed for ****13 cases**** of Sirloin Coulot (Picanha, Item `7152153`) totaling ****1,066.300 LBS**** (average `82.02 LBS/case` on an average `60 LBS` contract spec).

The Critical Operational Reality: In high-volume steakhouses, protein is highly perishable. Within hours of delivery, the boxes were ripped open, the meats were fabricated by the butchers, seasoned, and served to guests. ****The physical boxes and barcode labels were immediately thrown in the trash.****

The Forensic Black Hole: By the time the invoice discrepancy was flagged days later, the physical evidence had vanished. ****You cannot retrospectively audit a steak that has already been eaten.**** Because the dock team bypassed scale telemetry for **3 cases (246.80 LBS / \$2,243.41 USD)** via manual human check-in, the store had absolutely no physical evidence to dispute the billing. Without real-time, scale-locked verification at the exact millisecond of delivery, you are completely at the supplier's mercy.

THE OPERATIONAL TRUTH: If you do not capture telemetry at the exact moment the box crosses your dock, you are not managing inventory. You are managing ancient history.

Total Billed Weight (Invoice) 1,066.30 LBS	Verified Scale Weight (Digitally Logged) 819.50 LBS
Unverified Bypassed Weight 246.80 LBS (23.1% LEAK)	Contract Unit Price \$9.09 / LB
Total Unverified Loss Exposure \$2,243.41 USD	Receiving Compliance Score 76.9% (FAIL)

PROCESS COMPLIANCE FAILURE ESCALATION
This invoice was flagged under high-risk exceptions. **3 CASES BYPASSED DOCK SCALES VIA MANUAL CHECK-IN.** Immediate operational locking recommended. Prevent manual receiving overrides across all network tenants to stop margin leakage.
