

“Amateurism breaks restaurants every single day. Military discipline builds empires.”

Forget the romance of simply serving beautiful plates. This book is not a collection of tips; it is a tactical manual of operations. Forged in the trenches by Alexandre Garcia—an executive with over twelve years of experience leading the aggressive expansion of international titans like Texas de Brazil and Fogo de Chão—this is the definitive guide for operators who refuse to accept mediocre margins.

In *We Are Open*, you will abandon hope-based management and discover the anatomy of corporate scale:

- **The Eradication of Shrinkage:** How blind audits and cold technology extinguish theft and waste in your walk-in cooler.
- **From Operator to President:** Stop operating as the dining room "firefighter" and aggressively scale multi-unit operations (EBITDA Multiples and Smart Equity).
- **The Human Machine:** Non-negotiable strategies for the recruitment, leadership, and retention of high-performance squads.
- **The Lean Weapons:** How to deploy precision tools (VSM, Gemba, and 5S) to strangle operational inefficiencies.

If your objective is to transform your restaurant into a highly predictable, relentlessly profitable financial asset, open this book. We are open.

"Alexandre Garcia is the Founder of AGV Ventures and the architect of the Brasa Meat Intelligence OS, engineered exclusively for corporate scalability in the Food Service sector."
