DISCREPANCY ANALYSIS & FINDINGS

During the dock receiving audit on **5/15/2026**, BRASA Pilot Site #042 scanned and checked in exactly 10 cases of Item 7152153 (Sirloin Coulot) and 2 cases of Item 941861. The distributor billed the client for **13 cases of Item 7152153** with a total weight of **1,066.300 LBS**—resulting in an anomalous average of **82.02 LBS per case**, despite the contract spec indicating an average case weight of **60 LBS (1/60#AV)**.

Discrepancy Root Cause: The distributor's dispatch team accidentally loaded and scanned **3 cases intended for another client** onto the invoice, or billed catch weights for cases that were not physical delivered. The BRASA scale logs show the store received and signed for exactly 10 cases of Item 7152153, generating an overbilled variance.

Billed Weight (Invoice)
1,066.30 LBS

BRASA Verified Weight (Actual Received)
819.50 LBS

Billed Catch Weight Cases
13 Cases

Actual Received Cases
10 Cases

SOVEREIGN COMPLIANCE VERIFIED

This document is a certified extract from the BRASA Governance Engine, locked with cryptographic signature hash **SHA-256: 4C8CE5B20260518T11F**. Billed weight is disputed. Adjust for a credit memo of **246.80 LBS (\$2,243.41 USD)**.
